Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim 45-52, 53, 55-57, 59, 60, 62 are 103(a) as being unpatentable over Yamamoto in view of Farahmandi et al. Yamamoto teaches the claimed subject matter as set forth in the previous office action except for showing use of flat capacitor stacked plates. However, as set forth in Farahmandi et al such shape is conventional and in view of this teaching it would have been obvious to modify the Yamamoto system with the same, such choice dependent on the end use of the device.

Art Unit: 3742

Claim 54 is rejected under 35 U.S.C. 103(a) as being unpatentable over Yamamoto in view of

Farahmandi et al, further in view of Inagawa. Inagawa et al are applied for showing vertical stacking of the elements as conventional and in view of this teaching it would have been obvious to modify Yamamoto further to include the same, such choice obvious and dependent on the final shape of the device desired.

Claim 58, 61 are rejected 35 U.S.C. 103(a) as being unpatentable over Yamamoto in view of Farahmandi and Yoshida. Yoshida is applied for teaching use of casing to act as a conductor between adjacent stacks and in view of this teaching it would have been obvious to modify Yamamoto with the same to attain more space efficiency.

Applicant's arguments with respect to the claims have been considered but are moot in view of the new grounds of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark H Paschall whose telephone number is 703 308-1642. The examiner can normally be reached on 7am - 3pm.
